

CONTENTS

Review paper

1. J. Opiela – Apoptosis in preimplantation bovine embryos and methods used for its detection . . . 3

Genetics and farm animal breeding

2. M. Babicz, M. Pierzchała, B. Rejduch, M. Pastwa – Assessment of microsatellite sequence suitability for genetic structure analysis of Puławska pigs from conservation breeding. 17
3. P. Krzyścin, K. Korman – Two epitopes of blood serum immunoglobulins as indicators of physiological antibody deficiency in lambs 27
4. T. Rychlik, A. Radko, A. Krawczyk – Preliminary evaluation of the genetic structure of Świniarka sheep based on blood groups and polymorphic protein variants 35

Biology, physiology and animal reproduction

5. P. Gogol, A. Wierchoś-Hilczer – Membrane integrity, energy status and motility of rabbit spermatozoa stored for 2 days at 15°C. 43

Animal nutrition and feedstuffs

6. P. Epler, F. Borowiec, M. Sokołowska-Mikołajczyk – Effect of feeding carp with fat-supplemented pelleted diets on chemical composition of meat 51

Environment, hygiene and animal production technology

7. B. Tombarkiewicz, J. Grzyb, J. Doktor, B. Kalinowska, A. Węglarz, K. Pawlak, J. Niedziółka – Hygienic and sanitary conditions of the goat farm versus some health parameters of goats. 61
8. H.T. Korhonen, S. Cizinauskas, R. Viitmaa – Evaluation of the traditional way of euthanasia of farmed foxes from an animal welfare point of view. 73

Economics and the organization of animal production

9. M. Gumułka, K. Banaś, M. Rosół – Relationship of productivity and profitability of broiler chicken production to incidence of avian influenza in wild birds in Poland. 89
